

VETO

the most perfect Antiseptic for women!

Name and
trade-mark

registered!

VETO tablets are a reliable ANTISEPTIC and PRO-PHYLACTIC in the sphere of feminine hygienics. They are an infallible protection against infection, and in cases of disease will restore the mucous membrane to a healthy condition by destruction of the infective organism.

In cases where upon the advice of the physician, conception has to be avoided to disease of the lungs, of the heart, anomalies of the pelvis and other reasons, VETO tablets will serve as an infallible preventive.

The composition of VETO tablets is made on a purely scientific basis and gives them the following particular advantages, viz:

easily dissolved; simple and clean to use; disinfecting and germ killing; absolutely effective protection; free from poison and perfectly harmless even when continually used; unlimited durability when stored in a dry place!

It may be moreover emphasised that our VETO tablets even after having been stored for a length of time, in case of use immediately break into foam. By this foaming the cleansing and disinfecting ingredients penetrate into every recess of the mucous membrane and bring about perfect antiseptis.

Direction for use

For successful application the tablet should be pushed as deeply as possible into the sheath. Within a short time it will be dissolved. It is advisable to put back rinsing for a few hours after use.

The original box contains 12 VETO tablets, which should be kept in the glass tube and stored in a dry place.
