PINK SOLUBLE PESSARIES

a British Product.

“ The Contraceptive product which will eliminate the forethought of its own use will be the most popular means of contraception in all times and will become an international instrument for the purification of mankind.”

The “**FEMINOSAL**” Pessaries are based on the above psychological statement.

Every able-minded man and woman will understand the meaning of the above statement, namely, that in those moments when man and woman are under the spell of that biological urge of nature, no other thoughts should interfere with it. Therefore, how is it possible for anyone to look at the watch and follow up the instructions of so many brands of pessaries or other chemical contraceptives asking to :—“insert 10 or 11 minutes in advance.”

But you have to

79

The "**FEMINOSAL**" Pessary is being made with the lowest possible melting point, and as soon as it is inserted it dissolves and acts with rapidity.

BIRTH CONTROL has become a necessity for the present world in order to limit the number of children according to the family's income, and so to enable the parents to give them proper care and education; to prevent conception where one or both parents are afflicted by some physical or mental disease; **TO PREVENT CONCEPTION IN A WOMAN WHOSE LIFE AND HEALTH WOULD BE ENDANGERED BY PREGNANCY; TO ALLOW THE MOTHER A PERIOD OF REST AND COMPLETE RECOVERY BETWEEN BIRTHS.**

BIRTH CONTROL is now an open question, accepted for the benefit of all the nations of the world, and should be treated as the most prominent progress of science, and especially as the best safeguard **OF ALL MOTHERS.**

There are various contraceptive methods on the market which have all more or less their advantages and disadvantages. A well-known contraceptive is the rubber sheath, which not only prevents conception, but also infection, yet a great number of people consider same as an impediment and prefer unobtrusive methods, and the least obtrusive contraceptive is the "**FEMINOSAL**" pessary.

Tablets have often been found to fail where there is not sufficient moisture, which is necessary for tablets to dissolve, and even if the tablets dissolve, they absorb most of the vagina's moisture, thus causing dryness, therefore pain and sometimes injury.

Pessaries made of gelatine, which also depend on moisture, often fail to dissolve in the right time.

The "**FEMINOSAL**" Pessary dissolves rapidly through the heat of the body itself, whether there is any moisture or not, the greasy matter being of minimum quantity is scarcely noticed, the other contraceptive agents, being very powerful, kill the spermatozoa instantly, and they are at the same time antiseptic and non-injurious to body and health.

The "**FEMINOSAL**" Pink Soluble Pessary has many other advantages. It is smaller than the big size of pessaries usually brought on the market because it contains just the necessary material in which the contraceptive agents are evenly distributed and preserved and no surplus of unnecessary greasy matter is used.

We do not advertise to a great extent, but rely upon the recommendations of Doctors and "FEMINOSAL" Users. Many testimonials have been received, and we take this opportunity of thanking you for recommending the "FEMINOSAL" to your friends, who will certainly appreciate your advice.

Try "FEMINOSAL" Pessaries once and you will use no others.

DIRECTIONS
for using the
"FEMINOSAL"
Regd. Trade Mark.

Pink Soluble Pessaries.

Hygienically pure and effective.

Note the low melting point and the small size.

Insert one as high as possible about one or two minutes before each occasion.

Syringing may be carried out later, but this is not necessary, as the "FEMINOSAL" Pessaries contain antiseptic properties and less greasy matter.

When purchasing "FEMINOSAL" detach this prescription and simply hand over to your Supplier.
