

It is respectfully requested that in future the cost of postage be included in remittance for all goods.

No reduction in price can be made for quantities of more than one dozen, also, the 'make-up' of all Trial Packet will be altered.

The price of the "Lam-butt" Dutch Cap will be increased to 6/- for the Standard Quality and 8/6 for the Latex.

The "Lam-butt" Ladies' Syringe (see page 29 of the price list) is now priced 6/6, 8/6 and 12/6; the last mentioned having a cardboard instead of a polished wood box.

The Birth Control Advisory Bureau.

61, MARLBOROUGH ROAD,
HOLLOWAY, LONDON, N.19.

Tel.—Archway 2981.

is open daily, except Saturdays
for the purpose of fitting these
pessaries and giving advice.

A fully trained Nursing staff
is in attendance, and a fee is
charged for fitting.

IMPORTANT.

These Pessaries are
made in four different
sizes, known as 0, 1, 2
and 3.

Size 0 is suitable for
newly married Ladies,
or those who have not
given birth to a child.

Sizes 1 and 2 are usually suitable for those who have already given birth to one or two children, whilst Size 3 is usually only needed in cases where there have been three or more

children. This is for the guidance of those who cannot visit a Birth Control Clinic for advice as the success of the pessary largely depends on the correct size being obtained.

4th March 1941.

Dear Sir,

No. 1A Condoms from 5/- to 6/- per dozen and the No. 2A from 6/- to 8/- per dozen.

The reason for this is that although most of the Condoms we supply are of our own make, these two lines are not, and we are now paying a very considerable increase, of which we are only passing on part to our customers.

The original prices were highly competitive and are not possible under present conditions.

There is no increase in price of any of our other varieties and we would mention that our "Malthus" Sheaths (not silk-finish) (page 12 of price list) are still available, price 4/- per dozen.

We are sorry therefore that we are only able to send
you ten instead of the dozen ordered.

Assuring you that the old price will be restored as soon as possible.

Yours faithfully,

LAMBERTS PRORACE LIMITED.

SPECIAL TO PURCHASERS

All Mail Orders to : 60 and 62, Queen's Road, Dalston
Remittances may be made payable to E. LAMBERT & SON, if desired.

We never "circularise" customers, or "follow-up" after having received an order. This is a point worth considering, as some firms have this objectionable habit.

A LARGE part of our business is conducted through the post, and Country and Foreign Orders receive special attention. All orders are executed same day as received (special goods made to order excepted). A record of all home orders received is kept for eight days, by which time it is presumed the goods have been received by the customer, unless we are notified to the contrary in the meantime. The letters are then destroyed. In the case of Foreign and Colonial Orders, a record is kept for six months, after which period the letters are destroyed. All foreign orders should be accompanied by a sufficient remittance to include postage on the goods.

When ordering, please give full name and address, and specify the page upon which the appliance appears in this list. The name and address of the sender and full particulars should be sent with any articles returned; and if to be exchanged for other goods, the cost of the return carriage should be enclosed in stamps. Goods for exchange should be returned within 7 days.

All parcels are securely packed and every communication is considered *strictly private*.

The attention of customers is called to the fact that the amount of postage should be included in remittance for ALL goods except where otherwise stated.

Trade Discount allowed to the Medical Profession, Midwives, and Nurses on receipt of card.

Ladies can communicate with and be attended by the Manageress.

Business Hours : 9 to 6 ; Saturdays 9 to 1

SPECIAL NOTICE

WE have an Advisory Bureau for the benefit of married women who are in doubt as to the most suitable method to adopt

ORIGIN AND PURPOSE OF THE BIRTH CONTROL ADVISORY BUREAU

The Advisory Bureau at 61, Marlborough Road, Holloway, N.19, was originally opened as a Birth Control Clinic in 1925, but was taken over by this Company, for the benefit of customers seeking first-hand information and advice on the subject of Birth Control.

Advice is given free, either personally or through the post.

Hours of attendance: Monday, Tuesday, Wednesday, Friday, 10 a.m. to 6 p.m.; Thursday, 10 a.m. to 8 p.m. This Bureau is intended primarily for middle-class women, and the fee for consultation and fitting is one guinea—though a reduction is made in certain cases. Patients are seen and fitted by an experienced nurse, but a qualified woman doctor attends periodically and may be consulted by appointment. In connection with the bureau there is a travelling nurse service for women living at a distance. The fee for the travelling nurse is two guineas, plus travelling expenses.

Malthusian Appliances

Introductory Observations

ONE of the most remarkable social phenomena of the last decade is the general decrease in the birth-rate in all civilised countries. British Colonies, such as Australia and New Zealand—which cannot be said to suffer from over-population—exhibited a marked decrease in births. This world movement is beyond doubt the outcome of deliberate action, not an incident of mere “chance.” It is due to recognition of the fact that control of family-increase is both desirable and possible: desirable, because parents are thus enabled to adjust their responsibilities to their means; and possible, because experience has demonstrated that *safe* and *innocent* means have been devised by science and perfected by ingenuity.

It may be necessary again to point out to those who have not yet given serious thought to the subject that the limitation of families in accordance with the means available for their support is a duty imposed on parents by the dictates of morality. Every child is justly entitled to demand from its parents not only reasonable support during the early years of its existence, but also an adequate training and equipment for the “battle of life” which is ever becoming more strenuous and severe. In many cases this provision is possible for a small family, while it would be impossible for a large one; and to people of limited means the regulation of the number of children born is a matter of vital importance.

The validity of this view being admitted, it becomes necessary to determine the best and safest method of securing the desired control. It is obvious that *reliability* amounting to practical *certainly* is indispensable, for a single "accident," an unwished-for birth, may derange the most carefully-devised plans. Excellence in appliances depends upon the quality of the materials used, and upon unremitting care in the process of manufacture. A small saving in the purchase of appliances may mean the use of articles badly made from inferior materials, resulting in failure and disappointment. *All the appliances described in this list are manufactured with the greatest care; the best materials only are used; and every possible precaution is taken to ensure absolute reliability.*

The large variety of preventive appliances described in the following pages affords an opportunity for selection according to individual preference.

A word of important advice may be usefully given in concluding this brief introduction. The success of every appliance must depend ultimately upon the care and intelligence exercised in its use. Failure may arise, not from any defect in the article itself, but from lack of proper care and attention in using it. Full instructions, expressed in the clearest and simplest terms, are given with every appliance; and it is of the greatest importance that these instructions should be strictly followed. Provided this is done, there is no reason to anticipate failure in any case.

LAMBERTS PRORACE, LTD.

We have been manufacturing Birth Control appliances for over 50 years.

60-62, Queen's Road, Dalston, London, E.8, England

Condoms

All "Lam-butt" Condoms and "Lam-butt" Sheaths are tested by air pressure under microscopic examination, and every one is dated. Every Condom and Sheath is guaranteed to have been subjected to these tests on the actual day of sale, which is important.

No matter how thorough the method of testing may be, it is of no avail unless performed immediately before sale, as the extremely thin elastic quickly deteriorates if kept long in stock.

SPECIAL TRIAL PACKET No. 1

containing 12 Specimens :

No. 1. White Malthus Sheath, plain end ...	} Made in three sizes

60-62, Queen's Road, Dalston, London, E.8, England

The "LAM-BUTT" Featherweight Sheaths

These are of the SEAMLESS SILK FINISH variety, being the same quality as our "Lam-Butt" Special, but thinner. When worn they are scarcely perceptible.

No. 7.	Ivory finish, plain	10/6 doz.
	3 doz. 25/-				
No. 7a.	Transparent finish, plain	15/- doz.
	3 doz. 30/-				
No. 8.	Rose silk finish, plain	12/6 doz.
	3 doz. 30/-				
No. 8a.	Rose silk finish, receptacle ends	15/- doz.
	3 doz. 38/-				
No. 9.	Ivory finish, receptacle ends	12/6 doz.
	3 doz. 30/-				
No. 9a.	Transparent finish, receptacle ends	18/- doz.
	3 doz. 38/-				
No. 9b.	Transparent rose colour, receptacle ends	20/- doz.
	2 doz. 48/-				

A Sample of each will be sent on receipt of P.O. value 5/- Post Free United Kingdom. Abroad extra.

When ordering, the number only need be quoted.

Although these seamless silk finish are made in one size only, the rubber is so pliable and has such enormous stretching powers, that they are adaptable for most men. If too large, they need only be unrolled as far as required.

In cases where a larger or smaller size sheath is required, we recommend our No. 7B SILKY CONDOM, price 10/6 per dozen, which is made in either small, medium, or large size—in plain ends only.

Apparatus for re-rolling Elastic Sheaths after use. Price 2/9 Post Free United Kingdom.

"Contraceptalene," used in conjunction with the sheath. Price 2/6 per tube.

No. 7B

The "Lam-Butt" Silky Condom

The only Silk Finish Condom that is made in more than one size.
Small, medium, or large.

White Elastic—plain ends only.
Price ... 10/6 doz. 3 doz. 25/-
Samples 1/- each.

The "Lam-Butt" Special

Hand-made fine cream-coloured rubber. Every one guaranteed and reliable. Each may be used several times with safety.

No.10. Receptacle Ends..... 24/- doz.
No.10. Plain Ends..... 21/- doz.
No.10A Rose Super Elastic,
Receptacle Ends Only 27/- doz.

When ordering, the number only need be quoted.

Apparatus for re-rolling Elastic Sheaths after
use. Price 2/9 Post Free United Kingdom.

NATURAL SEAMLESS Silk-finish Sheaths

For those who require a cheaper
variety than the featherweight.

Medium Size only.

No. 1a. Plain ends 6/- doz.
No. 2a. Receptacle ends 8/- doz.
Samples 8d. & 10d. each.

These natural seamless Sheaths are especially recommended by
Michael Fielding in his book, "PARENTHOOD—DESIGN OR ACCIDENT".

60-62, Queen's Road, Dalston, London, E.8, England

ERRATA

Malthus Sheaths

PLEASE NOTE CORRECTED PRICES AS FOLLOWS :

| | 3 doz. 25/- | |

All the above are made in three sizes—small, medium, and large, indicated by numbers 1, 2, and 3 respectively.

Transparent Skin Sheaths

Manufactured from Animal Skin.

Transparent Skin Sheaths are on the same principle as the Malthus, but are of foreign manufacture from animal skin, and sent out in their normal form (unrolled). They are drawn over loose, and then damped with a soft pad or sponge; when so adjusted they are imperceptible. This is their chief recommendation.

The “Lam-Butt” Cap

(Registered)
(or Short Sheath)

The shape of the “LAM-BUTT” CAP is scientifically correct, making it most comfortable and natural in use.

It is entirely hand-made, of fine, cream-coloured rubber, and seamless.

Each cap may safely be used on a number of occasions, if carefully washed afterwards in warm water without soap, and dusted with french chalk to dry.

Made in one size only.

Sample “Lam-Butt” Cap	...	Post Free	1/- 2/-
No. 11	...	Price 10/6 per doz.	3 doz. 25/-

The “Lam-Butt” New Malthus Caps

These Caps are made of thin blown elastic, and are suitable for use once only.

Made in three sizes—Small, Medium, and Large.

No. 12.	Price, in White Rubber	4/- per doz.
	3 doz.	10/-			
No. 13.	Price, Extra Thin Pink	5/- per doz.

When ordering, the number and size only need be quoted.

60-62, Queen's Road, Dalston, London, E.8, England

The Sheaths on this page are intended for those where economy is of the greatest consideration

The "Lam-Butt Paragon" Sheath

This Sheath is intended for permanent use, being made of strong cut sheet rubber, with a moulded end of double thickness.

With ordinary care, one will last for twelve months, and we have testimonials from customers who have used one "PARAGON" SHEATH for two and even three years.

Having been introduced by the late Mr. E. J. Lambert as far back as 1891, we can truthfully assert that it has withstood the test of time.

No. 20 Price 6/- each; 3 for 15/-.

Or in Transparent Rubber, 8/6. Reinforced.

Made in three sizes: Small, Medium, and Large.

Re-rolling Apparatus Post Free 2/9

[We recommend customers to use the re-rolling apparatus, if they wish to obtain the best service from the "Paragon" and "Sovereign" Sheaths.]

The "Lam-Butt Sovereign" Sheath

We are introducing this Sheath to our customers' notice as a modification of our "Paragon" Sheath, which has commanded a large sale since 1891. LAMBERT'S "SOVEREIGN" SHEATH is much finer in texture than the "Paragon" Sheath, being manufactured from fine sheet rubber of a very silky nature, beautifully soft and pliable, and one Sheath may be used a number of times with perfect safety.

We strongly advise a trial of this Sheath, as the extremely soft nature of the rubber will recommend it to all who desire comfort with durability.

No. 21 Price 4/- each; 3 for 10/6

Or in Transparent Rubber, 5/9. Reinforced.

Made in three sizes: Small, Medium, and Large.

The "Lam-Butt" Seamless Washable Sheath

No. 21A. In Medium size only. Price 2/6.

When ordering, the number only need be quoted.

UNSOLICITED TESTIMONIAL.

Moss Side, Manchester.

Dear Sirs,

Will you please send me a price list of Paragon Sheaths, which I wish to pass on to a friend.

I have been using your Paragon Sheaths for the last 25 (twenty-five) years and never had a single failure.

You may make use of this if you care, but omit name and address.

Please let me have list per return, marked "Private."

Your faithfully, —

(The original of this may be seen on request at our Office.)

The "Prorace" Occlusive Cap (Registered)

AS RECOMMENDED IN "WISE PARENTHOOD" (ALL EDITIONS TO THE FIFTEENTH) AND OTHER MEDICAL BOOKS.

The "PRORACE" PESSARY is a simply-devised instrument of pure soft medicated rubber, to be worn by the female for supporting and covering the womb. It is constructed on a common-sense principle and strictly in accordance with the female organisation; can be worn any length of time with ease and comfort; and so accurately fits the parts that it adapts itself perfectly and no apprehension of its going too far or doing the slightest harm need be felt.

Can be supplied with or without the cord attachment, as this is not actually necessary.

Price	3/-	each, with solid Rubber Rim.
Price	5/-	each, in extra strong quality.
Price	7/6	each, Spring Rim.
Inland Postage 1½d. Abroad extra.				

Made in four sizes, known as Sizes 0, 1, 2, and 3, the smallest being Size 0 and the largest Size 3.

Registered "Dumas" Trade Mark

Anti-Geniture

Generally known as the "Dumas," this appliance has been successfully sold by us since 1884, and has in recent years been fitted at all the Birth Control Clinics throughout the United Kingdom.

The illustration of Dumas' "ANTI-GENITURE" shown in this leaflet is an exact reproduction of the medium size, which measures $2\frac{1}{8}$ ins. in diameter. The small size measures $1\frac{7}{8}$ ins. and the large $2\frac{3}{8}$ ins. respectively.

Small and Medium sizes are usually suitable for those who have already given birth to one or two children, while Large size is usually only needed in cases where there have been three or more children. This is for the guidance of those who cannot visit a Birth Control Clinic for advice as the success of the device largely depends on the correct size being obtained.

"ANTI-GENITURE," Complete, 10/6 in either Small, Medium, or Large size, including either Dumas Emollient or tube of Contraceptalene. Guaranteed for two years.

60-62, Queen's Road, Dalston, London, E.8, England

THE "BYMESTON"

(Registered Trade Mark)

THE "BYMESTON" METHOD.—A combination of two of the most up-to-date and safest methods known.

Especially recommended in "PARENTHOOD—
DESIGN OR ACCIDENT," by Michael Fielding.

REASONS WHY WE CLAIM THAT THE "BYMESTON" METHOD IS AN IMPROVEMENT.

The "BYMESTON" CHECK PESSARY is an improvement upon the ordinary pessary, because it has a small receptacle inside the cap to hold a contraceptive tablet. When the "Bymeston" Pessary is in position the tablet is just where it is wanted, right at the mouth of the womb. The old-fashioned method was to first adjust the cap pessary in position, and then insert a soluble pessary haphazard, with the result that the soluble pessary, when melted, would run from the vagina and be lost. The "Bymeston" method remedies this serious defect, as the contraceptive tablet, being inside the cap of the pessary, cannot escape when dissolved, and, furthermore, the "Bymeston" Pessary, with the tablet in position, can be adjusted two or three hours beforehand if desired, without fear of the tablet being lost.

"Bymeston" Tablets are non-greasy, and of the effervescing type, forming a smooth, creamy foam immediately in contact with moisture.

Made in four sizes: 0, 1, 2, and 3, Size 0 being the smallest.

Can be supplied with or without cord attachment, as this is not necessary.

Prices of "Bymeston" Pessaries, complete with 1 dozen Tablets:—

Spring Rim	10/-
Cheaper Quality, Solid Rubber Rim	7/9
"Bymeston" Pessaries (alone), without Tablets, Spring Rim	7/6
Ditto, Ditto, Solid Rubber Rim	5/-
Spare Tubes of "Bymeston" Tablets, containing—										
1 dozen	3/3
2 dozen	7/6

60-62, Queen's Road, Dalston, London, E.8, England

The "Bymeston" Tablets

The volume and thoroughness of the foam formed is adequately shown by the experiment illustrated.

1

2

3

4

A "Bymeston" tablet was placed into each of the four test tubes, and 2 c.c. of water added to tubes numbers 2, 3, and 4. The mass of foam shown was produced in the space of two minutes, and the foam retained its density for a considerable time. The "Bymeston" tablet in No. 1 tube was left intact for the purpose of comparison.

IMPORTANT.—"Bymeston" tablets must be kept in a dry place, in their original tube, tightly corked, away from the light.

"Bymeston" tablets can be used in conjunction with any make of check pessary or sanitary sponge.

60-62, Queen's Road, Dalston, London, E.8, England

Trade Mark **“BYMESTON”** Registered
Brand

Contraceptive and Antiseptic Tablets

ESPECIALLY RECOMMENDED FOR USE IN THE TROPICS, AS
THEY ARE QUITE UNAFFECTED BY CLIMATIC CONDITIONS.

These tablets are so manufactured that on dissolving in moisture they effervesce, and evolve hydrogen peroxide, which, in contact with organic matter is decomposed with the liberation of oxygen. It is the combined action of hydrogen peroxide and oxygen which kills the spermatozoa. It will be observed from this that a very powerful antiseptic solution is presented, which has the effect of thoroughly cleansing the entire female genital tracts.

It might further be pointed out that these tablets afford protection against innumerable other risks. Also a solution of one “Bymeston” tablet in water will give a thoroughly effective antiseptic solution which may be used periodically to cleanse the organs as occasions arise.

IMPORTANT.—As “Bymeston” Tablets are not affected by climatic conditions, they are particularly suitable for use as a preventative to conception *in the Tropics*, having none of the disadvantages of the ordinary soluble quinine pessary.

DIRECTIONS FOR USE.

Place a “Bymeston” tablet as high as possible into the *vagina*, *not less than three and not more than sixty minutes* before intercourse. If desired, the tablet may first be dipped in water, but this is not absolutely necessary.

Do not douche immediately after intercourse, but a douche may be used several hours afterwards, if desired.

The tablets should be kept tightly corked, and away from the light, where they will retain their properties almost indefinitely.

ESPECIALLY RECOMMENDED BY MICHAEL FIELDING IN HIS BOOK,
“PARENTHOOD: DESIGN OR ACCIDENT.”

Packed in Glass Tubes containing 12 Tablets.

Price .. **3/3** per Tube ; ~~2 Tubes 7/6.~~

SPONGE PESSARY

British
Made

Patent No.
216457

The "Bymeston" Sponge Pessary, used in conjunction with "Bymeston" Foaming Tablets is the most simple and effective double action method of preventing conception. The Appliance is manufactured of a special fine mesh rubber sponge and across the centre is fitted an elastic membrane through which nothing can pass. On the inner side is a moulded recess to hold the tablet, and on the outer side a flat elastic loop to facilitate removal.

The "Bymeston" Sponge Pessary is particularly recommended as an alternative method in those cases where, for any reason, a "Lam-butt" Dutch Cap cannot be fitted.

Although a fitting is advisable, the Appliance can be self fitted if desired, as full directions are given. Made in four sizes, 1, 2, 3 and 4. The smallest being size 1.

Size 1 is suitable for newly married ladies or those who have not given birth to a child. Sizes 2 and 3 are suitable for those who have already given birth to one or two children. While size 4 is usually only needed in cases where there have been three or more children. Larger sizes, up to the size of the largest "Lam-butt" Dutch Cap can be had to order.

PRICES.

"Bymeston" Sponge Pessaries in sizes 1, 2, 3 and 4. Complete with one dozen "Bymeston" Foaming Tablets	7/6
"Bymeston" Sponge Pessaries, extra large size (to order) complete with one dozen "Bymeston" Foaming Tablets	10/-
"Bymeston" Sponge Pessaries, without Tablets	5/- & 7/6 each
"Bymeston" Foaming Tablets, <u>3/3</u> or tube of one dozen tablets, or three tubes	<u>7/6</u>
Special Disinfecting Reservoir	1/6
Disinfecting Tablets, per bottle	1/6

“Lam-Butt” Contraceptalene

Especially mentioned in “MEDICAL ASPECTS OF CONTRACEPTION,” the *Report of the Medical Committee appointed in connection with investigations of the National Birth Rate Commission, 1927.*

Contraceptalene is a thick fluid jelly, prepared according to a formula supplied by a well-known Harley Street doctor, and is highly recommended for use as a combined contraceptive and lubricant, intended to be used in conjunction with condoms, rubber cap pessaries of all kinds, and sanitary sponges.

Contraceptalene is perfectly harmless to health, is a non-irritant, and is absolutely trustworthy even in the most inexperienced hands.

DIRECTIONS FOR USE.

CONDOMS.—The comfort in wearing a sheath is greatly enhanced if a little Contraceptalene is smeared over the top of the male organ itself and also over the outside top of the sheath just before use.

RUBBER CAP PESSARIES.—When using Contraceptalene, smear the cap with the preparation, inside and out, before insertion, especially round the rim.

SANITARY SPONGES.—The sponge should be first softened in warm water, then squeezed almost dry. Contraceptalene should then be smeared evenly over the whole surface of the sponge, especially at the sides.

After use the screw cap should be replaced on the tube of Contraceptalene, also the rubber cap should be placed over the end of the vaginal tube. Keep in a cool place.

Price complete ... 5/-
with ebonite unbreakable Vaginal Pipe.
Contraceptalene only ... 2/6 per tube.

60-62, Queen's Road, Dalston, London, E.8, England

SPECIAL NOTICE

25

Although we have not increased the prices of Soluble Pessaries or Bymeston Tablets, we are no longer able to make any reduction for quantities of 3, 6 or 12 dozen.

The "LAM-BUTT" Quinine Pessaries—

Price 2/6 per doz. ; 3 doz. 6/-

Ditto, Rose Scented—

Price 3/- per doz. ; 3 doz. 7/6

Double-strength Quinine—

Price 4/- per doz. ; 3 doz. 10/6

Ditto, Rose Scented—

Price 4/6 per doz. ; 3 doz. 12/-

The "LAM-BUTT" Non-Greasy Quinine Pessaries (these dissolve at once)—

Price 4/- per doz. ; 3 doz. 10/6

Ditto, Double-strength Quinine—

Price 5/6 per doz. ; 3 doz. 15/-

Special Introducer for using soluble Pessaries—5/- each

SPECIAL NOTICE

We are frequently asked if it is not a fact that there is one "blank" or "dud" Soluble Pessary in every box, and we take this opportunity of assuring customers that this is not the case. We guarantee that every "LAM-BUTT" Soluble Pessary contains the correct quantity of Quinine.

In cases where the Soluble Quinine Pessaries, also "Prorace" Chinosol Solubles, are required for use abroad, particularly in hot climates, we supply them with a higher melting point than usual, suitably packed.

Customers who wish either to send or take the pessaries abroad should mention the fact when ordering. No extra charge is made for soluble pessaries with a higher melting point.

The cocoa butter which we use in the manufacture of our soluble pessaries for the home trade has had the objectionable smell extracted by a special process, and they are therefore perfectly odourless.

“Lam-Butt” Rose Quinine Pessaries

Owing to many of our customers objecting to the odour of cocoa butter, we are now manufacturing a special line of Soluble Quinine Pessaries, delicately perfumed.

The perfume is harmless, and in no way interferes with the action of the pessary. They are known as

“ LAM-BUTT ”

ROSE QUININE PESSARIES.

Price ... 3/- dozen; 3 dozen 7/6

Ditto, Double Strength Quinine,

4/6 dozen ; 3 dozen 12/-.

Introducer for “Lam-Butt” Quinine Pessaries

The simple yet ingenious and effective contrivance is designed to facilitate the application of the “ Lam-Butt ” Soluble Quinine Pessaries. By its use the possibility of failure through misplacing of the pessary is practically averted. The Introducer is made of pure, hard metal, nickel plated, and its curved shape is admirably adapted for the purpose in view.

Price, in box ... 5/- each.

DESCRIBING A NEW AND BETTER CONTRACEPTIVE PREPARATION

The "BYMESTON" FOAMING JELLY is an entirely new type of contraceptive, and is the result of years of research and experimental work by experts in contraceptive methods.

The preparation is an improvement on all others because it gives protection immediately the contents of the tubes are inserted. Other preparations take time to dissolve or require moisture to aid their action, and this is sometimes lacking, and these factors are the cause of many failures.

The purpose of any contraceptive method is to prevent the male sperms connecting with the female cells in the womb, and the "BYMESTON" FOAMING JELLY offers the simplest and safest way. Other methods exist, but none are so dependable or practicable and they have never done away with fear and worry.

Leading authorities on the subject have said that the main requirement is a highly spermicidal preparation which will not only form a barrier, but will also kill all the sperm immediately they leave the male organ. "BYMESTON" FOAMING JELLY is the only preparation that offers both safeguards, since other methods generally offer only one form of barrier or one type of sperm-killing substance.

"BYMESTON" FOAMING JELLY is the most powerful sperm-killing preparation obtainable, and yet is definitely harmless in use, and the millions of male sperms ejected each time are killed immediately they come in contact with this preparation.

It is also most important that the preparation should spread quickly and fill the numerous crevices within the female passage, so that no male sperm can lurk there and become active some time later. "BYMESTON" FOAMING JELLY completely prevents this, due to what is known

as low-surface tension, certain special and new ingredients being used to achieve this penetrating effect.

This high degree of efficiency is only made possible by using the special "Tube within a Tube" which allows two preparations to be kept apart until the time for application. When the tube is pressed the contents of both tubes are squeezed out through a nozzle in which they mix and interact.

For use, the nozzle is placed within the vagina as far as possible, and the tube is then squeezed, with the result that the foam is deposited in the required position, so as to prevent pregnancy resulting from intercourse. Sufficient material for one application is contained in each tube, and in this matter medical experts have been consulted. They have stressed the importance of giving enough for all conditions, but, on the other hand, some people may find by experience that there is a little too much, and any excess may be wiped away.

The nozzle for application has likewise been improved after numerous tests, and can be used without fear of injury. This type bends easily and cannot do any harm.

In the interests of hygiene, a separate nozzle is supplied for each application, which should be thrown away afterwards. This presents a great improvement on the usual type of nozzle which is used for many applications and has to be washed each time.

Plain tubes are used to make disposal easy.

A preparation of this nature does not deteriorate even under extremes of climatic conditions.

"BYMESTON" FOAMING JELLY is guaranteed not to contain any irritating ingredients. It is odourless and pleasant to use.

Douching is unnecessary, but may be carried out at any time, if desired.

Price 5/- per box of 6 tubes and 6 nozzles.

Postage 4d.

60-62, Queen's Road, Dalston, London, E.8, England

The "Lam-Butt" Ladies' Syringe

With Adjustable Rubber Guard. Very powerful and effective.

Fitted with an extra large size bulb, holding 10 ozs. of fluid.

All other Spray Syringes have a capacity of 8 ozs. only.

This Syringe may be used in bed without soiling the bed linen.

None of the injection can escape owing to the special Rubber Guard.

This is fitted with a thin soft Rubber Tube in place of the hard ones usually sold, is extremely comfortable in use, and cannot cause pain.

Only the 12/6 quality has the soft rubber tube. Cheaper qualities have the ordinary Vulcanite tube.

The "Lam-butt" Ladies' Syringe (see page 28 of the price list) is now priced 6/6, 8/6 and 12/6; the last mentioned having a cardboard box instead of polished wood.

POSTAGE FREE United Kingdom.

The cheaper qualities are not fitted with the soft thin rubber tube or extra large sized bulb.

"Clenoid" Tablets make an excellent antiseptic douche, cleansing and soothing. Price 2/6 per bottle of 50.

The "Lam-Butt" Ladies' Syringe

The "Lam-Butt" Improved Vertical and Reverse Current Syringe

The improved appliance is a powerful enema of Higginson's pattern, fitted with a new Vertical and Reverse Current Vaginal Tube, producing a continual current treble the power of the ordinary tubes used for this purpose, thoroughly cleansing the parts it is applied to. It is intended to be used with the injections mentioned below, and if the instructions are followed it can be used with success and safety.

Complete with directions for use :

Drab Syringe, in card box	6/6
Black or Green, with screw mounts, in wood box	9/6
With nickel-plated mounts, in polished box	1/- extra
Cheap Moulded Enema Syringe, complete	2/6

Postage 3d. Abroad extra.

Vertical and Reverse Current Tubes, with bone pipe attached to fit any enema syringe ... 2/- each

INJECTIONS

for use with Syringe or Irrigator

Quinine Powders, each containing 20 grains	4/2 doz.
Specially-prepared Alum, Box containing 8 ozs.	1/9
"Clenoid" Tablets make an excellent antiseptic douche, cleansing and soothing. Per bottle of 50	2/6

60-62, Queen's Road, Dalston, London, E.8, England

Irrigator and Douche Apparatus

Vertical and Reverse Current

This apparatus can be used either in or out of bed, according to the needs of the case. The advantages of such instruments over syringes will be obvious to everyone. Apart from the fact that the current is constant and its force can be regulated, it prevents the woman from taking a chill when used in bed, and can always be kept ready for use.

Three-pint Canister, six feet of black tubing, vulcanite tap, and fitted with regulating barrel for producing gentle or powerful current 12/6 each in card box. Or in polished wood box 18/6

Ditto: Two-pint Canister, six feet of drab tubing, tap and Regulating barrel, in card box 8/6 each

Postage 6d. All complete, with full directions for use.

Ditto: Cheap quality, as used in Hospitals and Clinics 3/6 each

Postage 6d. United Kingdom.

THE SEXUAL SIDE OF MARRIAGE

By M. J. EXNER, M.D.

*Consultant to the American Social Hygiene
Association.*

Dr. Exner deals with great frankness, yet in complete good taste, with the intimate relationships in marriage, especially at the crucial points at which ignorance and mis-information commonly do serious or disastrous damage. Here, is an understandable, specific sailing chart, free from sentiment or hypocrisy, for the guidance of those who would achieve marriage at its best.
