UNITED STATES PATENT OFFICE.

WILLIAM C. HALLECK, OF NEW YORK, N. Y., ASSIGNOR OF ONE-HALF TO
ALBERT G. KALB, OF SAME PLACE.

DESIGN FOR A PESSARY.

SPECIFICATION forming part of Design No. 29,408, dated September 27, 1898.

Application filed August 22, 1898. Serial No. 689,524. Term of patent 7 years.

To all whom it may concern.

Be it known that I, WILLIAM C. HALLECK, of New York, in the county and State of New York, have invented and produced a new and original Design for Pessaries, of which the following is a full, clear, and exact description

This invention relates to designs for pessaries; and it consists, essentially, in the form or configuration of the device, substantially as shown in the accompanying drawings.

Referring to the drawings forming a part of this specification, Figure 1 is a perspective view of the device, and Fig. 2 is a vertical sectional view illustrating to better advantage the form of the base and body portion thereof.

The base 10 is curved so as to be cup-shaped in cross-section and has the upper edge thereof rounded and finished by a flange or rib 11. At the center of the base and projecting upwardly therefrom is a cylindrical stem 12, which is tapered slightly and which connects by a gradual curve 13 with an enlarged oval-shaped bulb 14.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

The design for a pessary substantially as herein shown and described.

WILLIAM C. HALLECK.
